Subject One more thing on monitoring and a RIA question

I talked to IBob after we spoke. He said that Marcus had told Art, or perhaps, Susan, that if OMB wants a 1 ton threshold, it would have to provide a rationale for that point of view. I believe he means a technical rationale, and not policy views. If you do have such a rationale, we would like to see it.

On the RIA, you said something to me when we spoke on the phone earlier about what you were expecting from us. I confess that I can't remember now exactly what you said. Could you please remind me what it is you are anticipating we provide to you tomorrow?

It would be helpful if you could call me tomorrow morning before 10 AM and let me know if you have comments on the RTC and if you plan to fax a mark-up or want to talk on the phone about them. I plan to come to DC tomorrow on a noon flight, so I would be unavailable between noon and 1 PM for a call, assuming the flight is on time, but other than that would try to make myself available for a call. We need to figure out as soon as possible tomorrow what remains to be done during the day to clear the package.

Thanks and I hope you have a good evening.
